SECURITY

NEW HELSTON ALARM GUN

The 'gun' fired by a trip or remote control pull wire, will take 12 bore short blanks or for closer proximity use our own 'primer' **It will not take live rounds.**

The 'gun' is machined from carbon steel and is zinc plated to resist rust. Screw holes are incorporated for secure fixing to fence post or tree trunks, stakes etc.

The **NEW ALARM GUN** can be fixed with nails or screws... back down to protect the cartridge head, or around the other way to protect the spring.

The device must not be deployed where animals or children can come into contact with it. Care in choosing a fixing position is essential, blast or ear injury can occur if incorrectly set. The new Helston Alarm Gun must only be used by competent persons.

SEAR

Allows critical engagement for light pull release. The Alarm gun can be angled to alter pull tension.

SAFETY PIN

Must be used to ensure no premature firing when setting.

SPARES REFERENCES

Striker	Code: 40-0150	Safety Pin	Code: 40-0153
Spring	Code: 40-0151	Washer	Code: 40-0154
Sear	Code: 40-0152		

The Helston Alarm Gun can be dangerous if used improperly. If any doubt refer to users instructions which are supplied with the device.

WAMADET ACTION SAFE

Complete with padlock

Code: 40-4200

HELSTON WAMADET ACTION SAFE

One of the strongest methods of securing a Firearm to the 'fabric of the building'.

- The lid has a full length 1" fold of 15 3/4" long on each side. The 14 gauge steel fold will require over 12 tons of thrust to unfold making it impossible to remove with a crowbar.
- The gun cannot be removed from the Action Safe (when locked) without completely destroying it.
- Many firearms can have a major component removed for added security.
- The Action Safe when screwed firmly to the building using five 2" long steel screws make it more than 4 times more difficult to remove from the wall than a gun cabinet using standard fixing screws.
- For added security a second padlock can be fitted.
- For most types of shotguns and some types of firearms the barrel can be removed and placed safety in another part of the house.
